Nairobi, Kenya.

WORK EXPERIENCE

Systems Developer - The Nairobi Hospital 07/2021-09/2021. Nairobi, Kenya.

The Nairobi Hospital is a medical expertise and services provider throughout East Africa and beyond as an advanced diagnostic, treatment and referral centre

Designed and implemented live and running company staff intranet using Bootstrap, PHP and Javascript programming languages

- Increased staff intranet interactions and engagement capabilities through revamping front-end using javascript(React, Ajax) and bootstrap.
- Improved site maintenance through implementation of Content Management System (CMS) for easy manipulation of data and content on staff intranet by administrator.
- Database design and development using MYSQL for ease scalability and high speed interactions.
- Integrated company's social media platforms to staff intranet enabling reach to wider audience with extended exposure.

SIDE PROJECTS

Take-note : note-taking system for organizing thoughts with rich and simple UI.
